Preface xxv

I Intermediate macroeconomics 1

1 Review of the AD-AS model 3
1.1 The aggregate labour market . . . 3
1.1.1 The demand for labour . . . 3
1.1.2 The supply of labour . . . 7
1.1.3 Aggregate supply in the goods market: Adaptive expectations . . . 13
1.1.4 Nominal wage rigidities . . . 15
1.2 Aggregate demand: Review of the IS-LM model . . . 16
1.2.1 The demand for money . . . 17
1.2.2 The IS-LM model . . . 18
1.2.3 The AD curve . . . 20
1.2.4 Effectiveness of fiscal policy . . . 20
1.3 Schools in macroeconomics . . . 21
1.3.1 Classical economists . . . 22
1.3.2 Keynesians . . . 22
1.3.3 The neo-Keynesian synthesis . . . 25
1.3.4 The monetarists . . . 27
1.3.5 New classical economists . . . 27
1.3.6 Supply siders . . . 28
1.3.7 New Keynesians . . . 29
1.4 Punchlines . . . 29

2 The open economy 33
2.1 Some international bookkeeping . . . 33
2.2 The IS-LM model for a small open economy . . . 35
2.2.1 Fixed exchange rates and immobile capital . . . 37
2.2.2 Fixed exchange rates and perfect capital mobility . . . 39
2.2.3 Flexible exchange rates with perfect capital mobility . . . 39

2.2.4 Imperfect capital mobility . . . 42
2.3 Aggregate supply considerations . . . 47
2.3.1 The Armington approach . . . 47
2.3.2 The extended Mundell-Fleming model . . . 51
2.4 Transmission of shocks in a two-country world . . . 57
2.4.1 Nominal wage rigidity in both countries . . . 61
2.4.2 Real wage rigidity in both countries . . . 64
2.4.3 Real wage rigidity in Europe and nominal wage rigidity in the United States 65
2.5 Punchlines . . . 70
Appendix: Analyzing two-country models . . . 72

3 Dynamics in aggregate demand and supply 77
3.1 What is stability? . . . 77
3.2 Adaptive expectations and stability . . . 78
3.3 Investment, the capital stock, and stability . . . 84
3.3.1 Adjustment costs and investment . . . 84
3.3.2 Stability . . . 90
3.4 Wealth effects and the government budget constraint . . . 94
3.4.1 Short-run macroeconomic equilibrium . . . 95
3.4.2 Money finance . . . 98
3.4.3 Bond finance . . . 99
3.5 A first look at hysteresis★ . . . 102
3.5.1 Alienation of the unemployed . . . 102
3.5.2 History matters . . . 104
3.6 Punchlines . . . 107

4 Perfect foresight and economic policy 109
4.1 Dynamic investment theory . . . 109
4.1.1 The basic model . . . 109
4.1.2 Fiscal policy: Investment subsidy . . . 114
4.2 A dynamic IS-LM model . . . 129
4.3 Exchange rate expectations and fiscal and monetary policy . . . 136
4.3.1 The Dornbusch model . . . 137
4.3.2 Price stickiness and overshooting . . . 141
4.4 Punchlines . . . 145

5 Rational expectations and economic policy 147
5.1 What are rational expectations? . . . 147
5.1.1 The basic idea . . . 147
5.1.2 Do we really believe the idea? . . . 153
5.2 Applications of REH in macroeconomics . . . 156
5.3 Should we take the PIP seriously? . . . 161
5.3.1 One-period nominal wage contracts . . . 161
5.3.2 Overlapping wage contracts . . . 163
5.4 Rational expectations in a small open economy★ . . . 168
5.4.1 Unmanaged economy . . . 170
5.4.2 Introduction to Dynare . . . 176
5.4.3 Managed economy . . . 183
5.5 Punchlines . . . 186

6 The government budget deficit **189**
6.1 Ricardian equivalence . . . 189
6.1.1 A simple model . . . 190
6.1.2 Distorting taxes . . . 198
6.1.3 Borrowing restrictions . . . 203
6.1.4 Finite lives . . . 204
6.1.5 Some further reasons for Ricardian non-equivalence . . . 209
6.1.6 Empirical evidence . . . 210
6.2 The theory of government debt creation . . . 210
6.2.1 A simple model of tax smoothing . . . 210
6.2.2 Implications from the tax smoothing model . . . 217
6.3 Punchlines . . . 220

7 A closer look at the labour market **223**
7.1 Some stylized facts . . . 223
7.2 Standard macroeconomic labour market theory . . . 228
7.2.1 Skilled and unskilled labour . . . 228
7.2.2 The effects of taxation . . . 235
7.2.3 The Holy Grail of macroeconomics . . . 241
7.3 Trade unions and the labour market . . . 242
7.3.1 Unions in partial equilibrium . . . 242
7.3.2 Unions in general equilibrium . . . 251
7.3.3 Unions and real wage rigidity . . . 253
7.4 Efficiency wages and the labour market . . . 254
7.4.1 Efficiency wages in partial equilibrium . . . 255
7.4.2 Efficiency wages in general equilibrium . . . 258
7.5 Punchlines . . . 260

8 Search in the labour market **265**
8.1 Search in the labour market . . . 265
8.1.1 A canonical two-sided search model . . . 266
8.1.2 Market equilibrium . . . 274
8.1.3 Comparative static effects . . . 275
8.1.4 Efficiency . . . 279
8.2 Applications of the canonical search model . . . 279
8.2.1 The effects of taxation . . . 280
8.2.2 Deposits on workers? . . . 281
8.3 Endogenous job destruction★ . . . 284
8.3.1 Basic assumptions . . . 284
8.3.2 Model . . . 285
8.3.3 Market equilibrium . . . 289
8.4 Punchlines . . . 293

9 Dynamic inconsistency in public and private decision making **295**
9.1 Dynamic inconsistency . . . 295
9.1.1 A classic tale . . . 295
9.1.2 A neoclassical tale . . . 296
9.1.3 Reputation as an enforcement mechanism . . . 300
9.2 The voting approach to optimal inflation . . . 304

9.3 Dynamic consistency and capital taxation . . . 307
9.3.1 The first-best optimum . . . 308
9.3.2 The second-best problem . . . 310
9.3.3 Dynamic inconsistency of the optimal tax plan . . . 313
9.4 Are consumers dynamically inconsistent? . . . 314
9.4.1 A dynamically consistent consumer . . . 315
9.4.2 A dynamically inconsistent consumer . . . 317
9.5 Punchlines . . . 321

II Towards advanced macroeconomics 325

10 Money 327
10.1 Functions of money . . . 327
10.2 Modelling money as a medium of exchange . . . 330
10.2.1 Setting the stage . . . 330
10.2.2 Shopping costs . . . 332
10.2.3 Money in the utility function . . . 333
10.3 Money as a store of value . . . 335
10.3.1 Overlapping-generations model of money . . . 338
10.3.2 Uncertainty and the demand for money . . . 341
10.4 The optimal quantity of money . . . 351
10.4.1 A basic general equilibrium model . . . 354
10.4.2 The satiation result . . . 357
10.4.3 Critiques of the full liquidity rule . . . 358
10.5 Punchlines . . . 362

11 New Keynesian economics 365
11.1 Reconstructing the "Keynesian" multiplier . . . 365
11.1.1 A static model with monopolistic competition . . . 366
11.1.2 The short-run balanced-budget multiplier . . . 372
11.1.3 The short-run multiplier in isolation . . . 374
11.1.4 The "long-run" multiplier . . . 374
11.1.5 Welfare effects . . . 379
11.2 Monopolistic competition and money . . . 381
11.3 Sticky prices and the non-neutrality of money . . . 383
11.3.1 Menu costs . . . 384
11.3.2 Quadratic price adjustment costs . . . 398
11.3.3 Staggered price contracts . . . 399
11.4 Punchlines . . . 401

12 Exogenous economic growth – Solow-Swan 405
12.1 Stylized facts of economic growth . . . 405
12.2 The Solow-Swan model . . . 406
12.2.1 No technological progress . . . 407
12.2.2 Technological progress . . . 409
12.3 Properties of the Solow-Swan model . . . 411
12.3.1 The golden rule of capital accumulation . . . 411
12.3.2 Transitional dynamics and convergence . . . 413
12.3.3 The speed of adjustment . . . 415

12.3.4 Human capital to the rescue . . . 418
12.4 Macroeconomic applications of the Solow-Swan model . . . 420
12.4.1 Fiscal policy in the Solow model . . . 420
12.5 Two-sector model . . . 425
12.6 Punchlines . . . 429

13 Exogenous economic growth – Ramsey-Cass-Koopmans 431
13.1 The Ramsey-Cass-Koopmans model . . . 431
13.1.1 The representative household . . . 432
13.1.2 The representative firm . . . 437
13.1.3 The phase diagram . . . 438
13.2 Properties of the Ramsey-Cass-Koopmans model . . . 440
13.2.1 Efficiency . . . 440
13.2.2 Transitional dynamics and convergence . . . 441
13.3 Macroeconomic applications of the Ramsey-Cass-Koopmans model . . . 442
13.3.1 Fiscal policy in the Ramsey-Cass-Koopmans model . . . 442
13.3.2 Ricardian equivalence once again . . . 444
13.4 An open-economy RCK model . . . 445
13.4.1 Some model complications . . . 445
13.4.2 Model solution and convergence speed . . . 447
13.4.3 Effects of an investment subsidy . . . 452
13.5 The RCK model with endogenous labour supply . . . 454
13.5.1 Model elements . . . 454
13.5.2 The phase diagram . . . 456
13.5.3 Permanent fiscal policy . . . 458
13.5.4 Temporary fiscal policy . . . 464
13.6 The RCK model with search unemployment . . . 470
13.6.1 Model elements . . . 470
13.6.2 Is unemployment efficient? . . . 476
13.6.3 Transitional dynamics . . . 478
13.7 A monetary RCK model . . . 481
13.7.1 Model elements . . . 481
13.7.2 Equilibrium . . . 488
13.7.3 Monetary neutrality? . . . 489
13.8 Punchlines . . . 491
13.9 Further reading . . . 493
Appendix: Phase diagram for the unit-elastic RCK model . . . 494

14 Endogenous economic growth 499
14.1 Introduction . . . 499
14.2 "Capital-fundamentalist" models . . . 499
14.2.1 Factor substitutability . . . 500
14.2.2 *AK* models . . . 503
14.3 Human capital formation . . . 515
14.3.1 Steady-state growth . . . 518
14.3.2 Transitional dynamics . . . 520
14.3.3 Concluding remarks . . . 521
14.4 Endogenous technology . . . 522
14.4.1 R&D and expanding input variety . . . 522

14.4.2 R&D and rising input quality . . . 531
14.5 Punchlines . . . 540

15 Overlapping generations in continuous time **543**
15.1 Introduction . . . 543
15.2 Individual behaviour under lifetime uncertainty . . . 543
15.2.1 Yaari's lessons . . . 543
15.2.2 Realistic mortality profile . . . 552
15.3 Macroeconomic consequences of lifetime uncertainty . . . 558
15.3.1 Individual households . . . 558
15.3.2 Aggregate households . . . 560
15.3.3 Firms . . . 562
15.3.4 Government and market equilibrium . . . 562
15.3.5 Phase diagram . . . 563
15.4 Basic model properties . . . 565
15.4.1 Fiscal policy . . . 565
15.4.2 Non-neutrality of government debt . . . 565
15.4.3 Economic growth . . . 567
15.4.4 Dynamic efficiency . . . 568
15.4.5 Small open economy . . . 571
15.5 Endogenous labour supply . . . 579
15.5.1 Model elements . . . 580
15.5.2 Phase diagram . . . 581
15.5.3 Raising the consumption tax . . . 585
15.5.4 Quantitative evidence . . . 588
15.6 Punchlines . . . 590
Appendix: Derivation of the phase diagram . . . 594

16 Overlapping generations in discrete time **597**
16.1 The Diamond-Samuelson model . . . 597
16.1.1 Households . . . 598
16.1.2 Firms . . . 599
16.1.3 Market equilibrium . . . 600
16.1.4 Dynamics and stability . . . 601
16.1.5 Efficiency . . . 601
16.2 Social security and the macroeconomy . . . 603
16.2.1 Pensions . . . 603
16.2.2 PAYG pensions and endogenous retirement . . . 616
16.2.3 The macroeconomic effects of ageing . . . 623
16.3 The tragedy of annuitization . . . 626
16.4 Further applications of the DS model . . . 630
16.4.1 Human capital accumulation . . . 630
16.4.2 Public investment . . . 640
16.4.3 Endogenous fertility . . . 649
16.5 Punchlines . . . 653

III Stochastic general equilibrium macroeconomics 659

17 Decision making in a stochastic environment 661
17.1 Introduction . . . 661
17.2 Dynamic programming in a deterministic world . . . 661
17.2.1 Finite planning horizon . . . 662
17.2.2 Infinite planning horizon . . . 670
17.3 Dynamic programming in a stochastic world . . . 672
17.3.1 Finite planning horizon . . . 673
17.3.2 Infinite planning horizon . . . 683
17.4 Complete markets and Arrow-Debreu securities . . . 685
17.4.1 Model . . . 685
17.4.2 Pareto optimal allocation . . . 686
17.4.3 Decentralization with Arrow-Debreu securities . . . 687
17.5 Constructing the representative agent . . . 690
17.6 Punchlines . . . 692

18 Dynamic Stochastic General Equilibrium – New Classical models 695
18.1 The Lucas research programme . . . 695
18.2 Building the unit-elastic RBC model . . . 696
18.2.1 Households . . . 697
18.2.2 Firms . . . 701
18.3 Model analysis . . . 703
18.3.1 Loglinearized model . . . 704
18.3.2 The shock process . . . 708
18.3.3 Impulse-response functions . . . 709
18.3.4 Correlations . . . 716
18.3.5 A detour: Dynare comes to the rescue . . . 718
18.4 Extending the model . . . 719
18.4.1 Employment variability puzzle . . . 722
18.4.2 Productivity puzzle . . . 726
18.4.3 Unemployment . . . 726
18.5 Punchlines . . . 727
Appendix: On the unit-elastic RBC model . . . 730

19 Dynamic Stochastic General Equilibrium – New Keynesian models 735
19.1 Introduction . . . 735
19.2 Building an MBC model . . . 736
19.2.1 Firms . . . 737
19.2.2 Households . . . 744
19.2.3 Macroeconomic equilibrium . . . 746
19.3 The canonical New Keynesian DSGE model . . . 747
19.3.1 Preliminary steps (without apologies) . . . 749
19.3.2 Stability . . . 754
19.3.3 Interest rate setting, instability, and Taylor rules . . . 757
19.4 Back to the general case . . . 759
19.4.1 Calibration . . . 760
19.4.2 Computation . . . 762
19.4.3 Visualizing some shocks . . . 765

19.5 Estimation rather than calibration . . . 771
19.5.1 Model features . . . 771
19.5.2 Model calibration and estimation . . . 775
19.5.3 Main findings . . . 776
19.6 Critics . . . 776
19.6.1 New Classical critics . . . 777
19.6.2 New Keynesian critics . . . 777
19.7 Punchlines . . . 779

Mathematical appendix **781**
A.1 Introduction . . . 781
A.2 Matrix algebra . . . 781
A.2.1 General . . . 781
A.2.2 Addition, subtraction, multiplication . . . 781
A.2.3 Transposition . . . 782
A.2.4 Square matrices . . . 783
A.2.5 Cramer's Rule . . . 785
A.2.6 Characteristic roots and vectors . . . 786
A.2.7 Literature . . . 788
A.3 Implicit function theorem . . . 788
A.3.1 Single equation . . . 788
A.3.2 System of equations . . . 790
A.3.3 Literature . . . 791
A.4 Static optimization . . . 791
A.4.1 Unconstrained optimization . . . 791
A.4.2 Equality constraints . . . 792
A.4.3 Inequality constraints . . . 794
A.4.4 Literature . . . 796
A.5 Single differential equations . . . 796
A.5.1 First-order (constant coefficients) . . . 797
A.5.2 First-order (variable coefficients) . . . 798
A.5.3 Leibnitz's rule . . . 799
A.5.4 Literature . . . 799
A.6 Systems of differential equations . . . 799
A.6.1 The Laplace transform . . . 800
A.6.2 Simple applications . . . 803
A.6.3 Systems of differential equations . . . 805
A.6.4 Hysteretic models . . . 810
A.6.5 Literature . . . 813
A.7 Difference equations . . . 813
A.7.1 Basic methods . . . 814
A.7.2 The z-transform . . . 815
A.7.3 Simple application . . . 816
A.7.4 The saddle-path model . . . 817
A.7.5 Literature . . . 818
A.8 Dynamic optimization in continuous time . . . 818
A.8.1 From Lagrange to the Optimum Principle . . . 818
A.8.2 Unconstrained . . . 821
A.8.3 (In)equality constraints . . . 823

A.8.4 Second-order conditions 823
A.8.5 Literature 823

List of Figures

1.1 Short-run profit maximization . . . 5
1.2 The demand for labour . . . 7
1.3 The consumption-leisure choice . . . 9
1.4 The supply of labour . . . 10
1.5 Aggregate supply and expectations . . . 14
1.6 Aggregate supply with downward nominal wage rigidity . . . 16
1.7 The liquidity preference function . . . 19
1.8 Derivation of the LM curve . . . 20
1.9 Monetary and fiscal policy in the classical model . . . 23
1.10 Monetary and fiscal policy in the Keynesian model . . . 24
1.11 Monetary and fiscal policy in the neo-Keynesian synthesis model . . . 26
1.12 The Laffer curve . . . 29

2.1 The degree of capital mobility and the balance of payment . . . 37
2.2 Monetary and fiscal policy with immobile capital and fixed exchange rates . . . 38
2.3 Monetary and fiscal policy with perfect capital mobility and fixed exchange rates 40
2.4 Monetary policy with perfect capital mobility and flexible exchange rates . . . 41
2.5 Fiscal policy with perfect capital mobility and flexible exchange rates . . . 43
2.6 Foreign interest rate shocks with perfect capital mobility and flexible exchange rates 44
2.7 Monetary policy with imperfect capital mobility and flexible exchange rates . . . 46
2.8 Aggregate supply in the open economy . . . 54
2.9 Aggregate demand shocks under wage rigidity . . . 56
2.10 Monetary policy under wage rigidity . . . 58
2.11 Fiscal policy with nominal wage rigidity in both countries . . . 62
2.12 Monetary policy with nominal wage rigidity in both countries . . . 63
2.13 Fiscal policy with real wage rigidity in both countries . . . 66
2.14 European fiscal policy with real wage rigidity in Europe and nominal wage rigidity in the United States . . . 67
2.15 US fiscal policy with real wage rigidity in Europe and nominal wage rigidity in the United States . . . 68
2.16 US monetary policy with real wage rigidity in Europe and nominal wage rigidity in the United States . . . 69

3.1 Fiscal policy under adaptive expectations . . . 80
3.2 Stability and adaptive expectations . . . 84
3.3 Adjustment costs of investment . . . 85
3.4 Comparative static effects in the IS-LM model . . . 91

3.5 The effect on capital of a rise in public spending . . . 92
3.6 Capital accumulation and the Keynesian effects of fiscal policy . . . 93
3.7 The effects of fiscal policy under money finance . . . 97
3.8 Fiscal policy under (stable) bond financing . . . 101
3.9 Long-run effect of fiscal policy under different financing modes . . . 103

4.1 Investment with constant real wages . . . 115
4.2 Derivation of the saddle path . . . 117
4.3 An unanticipated and permanent increase in the investment subsidy . . . 119
4.4 An unanticipated and permanent increase in the rate of interest . . . 121
4.5 An anticipated and permanent increase in the rate of interest . . . 122
4.6 Investment with full employment in the labour market . . . 124
4.7 An anticipated and permanent abolition of the investment subsidy . . . 125
4.8 An unanticipated and temporary increase in the investment subsidy . . . 127
4.9 A fall in the tax on labour income: investment and employment effects . . . 130
4.10 The short-run and long-run labour market effects . . . 131
4.12 Anticipated fiscal policy . . . 135
4.13 Understanding the quasi-reduced-form expressions for y and R_S . . . 139
4.14 Phase diagram for the Dornbusch model . . . 140
4.15 Fiscal policy in the Dornbusch model . . . 142
4.16 Monetary policy in the Dornbusch model . . . 143
4.17 Exchange rate dynamics with perfectly flexible prices . . . 144

5.1 Monetary policy under adaptive expectations . . . 148
5.2 Expectational errors under adaptive expectations . . . 149
5.3 The normal distribution . . . 151
5.4 Actual and expected price under REH . . . 154
5.5 Actual and expected price under AEH . . . 155
5.6 Wage setting with single-period contracts . . . 162
5.7 The optimal contract length . . . 167
5.8 Price flexibility and the characteristic roots of Δ . . . 172

6.1 Ricardian equivalence experiment . . . 193
6.2 Liquidity restrictions and the Ricardian experiment . . . 204
6.3 Overlapping generations in a three-period economy . . . 205
6.4 Optimal taxation . . . 217
6.5 Optimal taxation, tax smoothing, and deficit financing . . . 219

7.1 Postwar unemployment in selected OECD countries . . . 224
7.2 Unemployment over the centuries . . . 226
7.3 The markets for skilled and unskilled labour . . . 230
7.4 The effects of taxation when wages are flexible . . . 239
7.5 The effects of taxation with a fixed consumer wage . . . 241
7.6 Labour demand and supply and the macroeconomic wage equation . . . 242
7.7 The iso-profit locus and labour demand . . . 244
7.8 Indifference curves of the union . . . 245
7.9 Wage setting by the monopoly union . . . 247
7.10 Wage setting in the right-to-manage model . . . 249
7.11 Wages and employment under efficient bargaining . . . 250
7.12 Unions and wage dispersion in a two-sector model . . . 252

7.13 Unions and unemployment in a two-sector model . . . 254
7.14 Efficiency wages . . . 255
7.15 A tractable effort function . . . 257
7.16 Efficiency wages and unemployment in a two-sector model . . . 260

8.1 Search equilibrium in the labour market . . . 275
8.2 The effects of a higher job destruction rate . . . 276
8.3 The effects of a payroll tax . . . 281
8.4 The effects of a labour income tax . . . 282
8.5 The effects of a deposit on labour . . . 283
8.6 The uniform distribution and job scrapping . . . 286
8.7 Job creation and destruction in the labour market . . . 291
8.8 The effects of a higher unemployment benefit . . . 292

9.1 Consistent and optimal monetary policy . . . 298
9.2 Temptation and enforcement . . . 303
9.3 The frequency distribution of the inflation aversion parameter . . . 305

10.1 The barter economy . . . 328
10.2 Money as a store of value . . . 337
10.3 Choice set with storage and money . . . 340
10.4 Portfolio choice . . . 348
10.5 Portfolio choice and a change in the expected yield on the risky asset . . . 352
10.6 Portfolio choice and an increase in the volatility of the risky asset . . . 353
10.7 Monetary equilibrium in a perfect foresight model . . . 356

11.1 Government spending multipliers . . . 373
11.2 Multipliers and firm entry . . . 376
11.3 Menu costs . . . 390

12.1 The Solow-Swan model . . . 410
12.2 Per capita consumption and the savings rate . . . 413
12.3 Per capita consumption during transition to its golden rule level . . . 414
12.4 Growth convergence . . . 415
12.5 Conditional growth convergence . . . 416
12.6 Augmented Solow-Swan model . . . 419
12.7 Fiscal policy in the Solow-Swan model . . . 423
12.8 Ricardian non-equivalence in the Solow-Swan model . . . 424

13.1 Phase diagram of the Ramsey-Cass-Koopmans model . . . 439
13.2 Fiscal policy in the Ramsey-Cass-Koopmans model . . . 443
13.3 Investment in the open economy . . . 451
13.4 An investment subsidy with high mobility of physical capital . . . 453
13.5 Phase diagram of the unit-elastic model . . . 458
13.6 Effects of fiscal policy . . . 461
13.7 Phase diagram of the linearized model . . . 462
13.8 Temporary fiscal policy . . . 466
13.9 The transition function for temporary and permanent shocks . . . 467
13.10 Phase diagram for a temporary shock . . . 468
13.11 Transitional dynamics in the RCK unemployment model . . . 487

A13.1 The $\chi(L)$ function characterizing labour market equilibrium . . . 495
A13.2 Constructing the capital isocline . . . 495
A13.3 Phase diagram of the calibrated unit-elastic model . . . 498

14.1 Difficult substitution between labour and capital . . . 502
14.2 Easy substitution between labour and capital . . . 503
14.3 Consumption-capital ratio . . . 507
14.4 Steady-state growth due to public infrastructure . . . 511
14.5 Productive government spending and growth . . . 512
14.6 Quality ladders . . . 532
14.7 Effective demand facing the quality leader . . . 534
14.8 Equilibrium in the Rising Input Quality model . . . 539

15.1 Cumulative distribution function . . . 545
15.2 Density function and survival probability . . . 545
15.3 Actual and fitted survival fraction for the Dutch cohort born in 1960 . . . 553
15.4 Features of a realistic mortality profile . . . 554
15.5 Life-cycle profiles . . . 556
15.6 Phase diagram of the Blanchard-Yaari model . . . 564
15.7 Fiscal policy in the Blanchard-Yaari model . . . 566
15.8 Endogenous growth in the Blanchard-Yaari model . . . 568
15.9 Dynamic inefficiency and declining productivity . . . 572
15.10 A patient small open economy . . . 574
15.11 A productivity shock . . . 575
15.12 An impatient small open economy . . . 576
15.13 A temporary productivity shock in a non-saving nation . . . 576
15.14 A temporary productivity shock in the RA model . . . 579
15.15 Phase diagram for the extended Blanchard-Yaari model . . . 583
15.16 Factor markets . . . 584
15.17 Consumption taxation with a dominant GT effect . . . 587
15.18 Consumption taxation with a dominant FS effect . . . 588
15.19 Transitional dynamics in the extended BY model . . . 591
A15.1 Phase diagram of the calibrated extended BY model . . . 596

16.1 The unit-elastic Diamond-Samuelson model . . . 602
16.2 Individual effect of a fully-funded pension system . . . 605
16.3 Individual effect of a PAYG pension system . . . 607
16.4 PAYG pensions in the unit-elastic model . . . 609
16.5 Deadweight loss of taxation . . . 622
16.6 The effects of ageing . . . 626
16.7 Impact and long-run effect of opening an annuity market . . . 628
16.8 Introducing a perfect annuity market . . . 629
16.9 Endogenous growth due to human capital formation . . . 634
16.10 Public and private capital . . . 643
16.11 Steady-state fertility rate and capital intensity . . . 654

17.1 Value functions and policy functions: Deterministic case . . . 669
17.2 Markov process for labour productivity . . . 675
17.3 Labour productivity over the life cycle . . . 676
17.4 Value functions: Stochastic case . . . 680

17.5 Policy functions: Stochastic case 681

18.1 A shock to technology and the labour market 710
18.2 Purely transitory productivity shock 713
18.3 Permanent productivity shock 715
18.4 Temporary productivity shock 717
18.5 Visualizing contemporaneous correlations 723
18.6 Lottery model and contemporaneous correlations 725

19.1 Transitory productivity shock 766
19.2 Transitory money supply shock 769
19.3 Transitory government consumption shock 772

A.1 Non-negativity constraints 795
A.2 Piecewise continuous function 802

List of Tables

2.1 Imperfect capital mobility under fixed and flexible exchange rates . . . 45
2.2 The extended Mundell-Fleming model . . . 55
2.3 Wage rigidity and demand and supply shocks . . . 56
2.4 A two-country extended Mundell-Fleming model . . . 60

4.1 The Dornbusch model . . . 138

5.1 A Dynare model file for the sticky-price model . . . 178
5.2 Output from the Dynare model output file `Program05_01.mod` file . . . 181
5.3 A Dynare model file with a monetary policy rule . . . 184
5.4 Selected output from the Dynare model output `Program05_02.mod` file . . . 187

7.1 Taxes and the competitive labour market . . . 238

11.1 A simple macro model with monopolistic competition . . . 371
11.2 A simple monetary monopolistic competition model . . . 382
11.3 A simplified Blanchard-Kiyotaki model (no menu costs) . . . 387
11.4 Menu costs and the markup . . . 396
11.5 Menu costs and the elasticity of marginal cost . . . 396

12.1 The Meade-Uzawa growth model . . . 427

13.1 The Ramsey-Cass-Koopmans growth model . . . 438
13.2 Convergence speed in the Ramsey-Cass-Koopmans model . . . 442
13.3 The Ramsey-Cass-Koopmans model for the open economy . . . 448
13.4 The unit-elastic RCK model . . . 456
13.5 Government consumption multipliers and elasticities . . . 465
13.6 The RCK model with search unemployment . . . 475
13.7 A Matlab file for the Ramsey-Cass-Koopmans model . . . 482
13.8 Matlab function for the steady state . . . 484
13.9 Matlab function for the transition path . . . 485
13.10 The monetary RCK model . . . 489

14.1 An *AK* growth model with inter-firm external effects . . . 506
14.2 An *AK* growth model with public capital . . . 509
14.3 Growth and human capital accumulation . . . 519

15.1 The Blanchard-Yaari model . . . 562

15.2 The extended Blanchard-Yaari model 582
15.3 The linearized extended BY model 585
15.4 The birth rate and the GT effect 589

16.1 Age composition of the population 624
16.2 Growth, human capital, and overlapping generations 632

17.1 Some numerical examples 665

18.1 The basic RBC model 703
18.2 The log-linearized RBC model 704
18.5 The unit-elastic RBC model 718
18.4 A Dynare model file for the basic RBC model 720

19.1 The basic MBC model 748
19.2 A minimal DSGE model 749
19.1 A Dynare model file for the general MBC model 763

A.1 Commonly used Laplace transforms 801
A.2 Commonly used z-transforms 816

List of Intermezzos

1.1 The Cobb-Douglas production function and labour demand . . . 6
1.2 The Stone-Geary utility function and labour supply . . . 11
1.3 Baumol's transactions theory of the demand for money . . . 17

2.1 Imperfect substitution between domestic and foreign goods: Armington . . . 48

3.1 The expected price level under the adaptive expectations hypothesis . . . 81
3.2 The cost of capital to the firm: Modigliani-Miller . . . 86

4.1 Tobin's q-theory of investment . . . 112
4.2 Tobin's q as the present value of discounted marginal products of capital . . . 118
4.3 Some production theory: the two-factor production function . . . 126

5.1 The method of undetermined coefficients in a rational expectations model . . . 158
5.2 Solving the two-period overlapping wage contract model . . . 165
5.3 Asymptotic variance . . . 167

6.1 The two-period consumption model . . . 194
6.2 Ricardian equivalence in a small open economy that taxes interest income . . . 200
6.3 Welfare loss of taxation . . . 211

7.1 Some production theory: the three-factor production model . . . 231

8.1 Some statistical theory . . . 270
8.2 Comparative static effects in the matching model of unemployment . . . 276
8.3 Some tedious derivations for the matching model of unemployment . . . 288

9.1 Deriving the optimal spending and taxation rules . . . 312

10.1 Attitude to risk . . . 345

11.1 Two-stage budgeting and Dixit-Stiglitz preferences . . . 367
11.2 Multipliers and the marginal cost of public funds . . . 380
11.3 The envelope theorem . . . 387

12.1 Deriving the fundamental differential equation for the Solow-Swan model . . . 408
12.2 Some tedious derivations for the Meade-Uzawa model . . . 428

13.1 Deriving the household's lifetime budget constraint under perfect foresight . . . 433

13.2 Deriving the Euler equation with the method of optimal control 435
13.3 The method of undetermined coefficients in a perfect foresight model 449

14.1 Loglinearization of an endogenous growth model 513

15.1 Technical results for the Yaari model 549

16.1 Some tedious but important derivations for the Diamond-Samuelson model . . . 605
16.2 Government solvency condition under perfect foresight 614
16.3 Dynamic consistency of the social planner 638
16.4 Calvo-Obstfeld two-step procedure 646

18.1 Optimal household and firm decisions under uncertainty 699
18.2 Deriving the firm's objective function 702
18.3 Linearization of nonlinear stochastic systems 704

19.1 The continuum approach to product differentiation 738
19.2 Some derivations for the New Keynesian DSGE model 742
19.3 Blanchard-Kahn stability and existence conditions 756

A.1 Matrix inversion 784
A.2 Eigenvalues, eigenvectors, and matrix diagonalization 787
A.3 Generalized implicit function theorem: a macroeconomic application 790
A.4 Pegging the nominal interest rate 811
A.5 Current account dynamics 812
